Development and validation of a multidimensional gas chromatography/combustion/isotope ratio mass spectrometry-based test method for analyzing urinary steroids in doping controls

Marlen Putz, Thomas Piper, Alessandro Casilli, Francisco Radler de Aquino Neto, Fausto Pigozzo, Mario Thevis

PII: S0003-2670(18)30605-6

DOI: [10.1016/j.aca.2018.05.016](https://doi.org/10.1016/j.aca.2018.05.016)

Reference: ACA 235953

To appear in: *Analytica Chimica Acta*

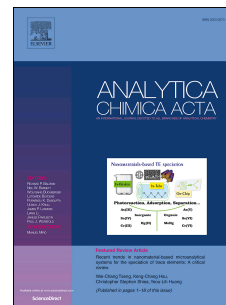

Received Date: 6 March 2018

Revised Date: 30 April 2018

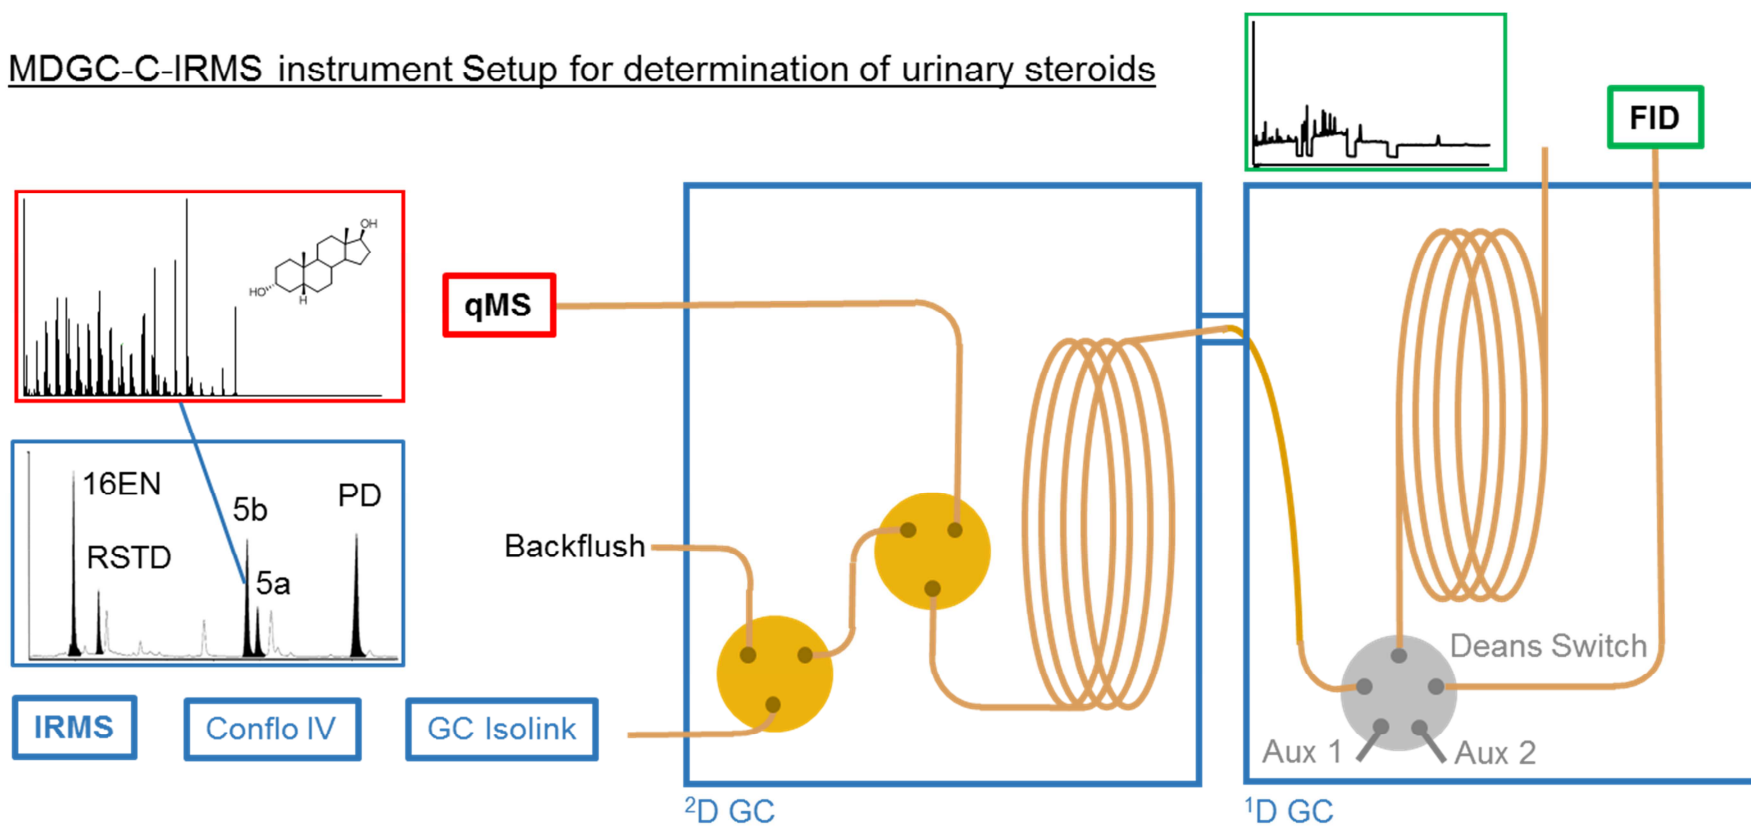

Accepted Date: 3 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

MDGC-C-IRMS instrument Setup for determination of urinary steroids
