

Accepted Manuscript

Characterization of singly and multiply PEGylated insulin isomers by reversed-phase ultra-performance liquid chromatography interfaced with ion mobility mass spectrometry

Selim Gerislioglu, Scott R. Adams, Chrys Wesdemiotis

PII: S0003-2670(17)31420-4

DOI: [10.1016/j.aca.2017.12.009](https://doi.org/10.1016/j.aca.2017.12.009)

Reference: ACA 235605

To appear in: *Analytica Chimica Acta*

Received Date: 11 August 2017

Revised Date: 27 November 2017

Accepted Date: 3 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
