Development of a lateral flow immunoassay of C-reactive protein detection based on red fluorescent nanoparticles

Yanxue Cai, Keren Kang, Yujia Liu, Yu Wang, Xiaowei He

PII: S0003-2697(18)30526-8

DOI: [10.1016/j.ab.2018.06.017](https://doi.org/10.1016/j.ab.2018.06.017)

Reference: YABIO 13054

To appear in: *Analytical Biochemistry*

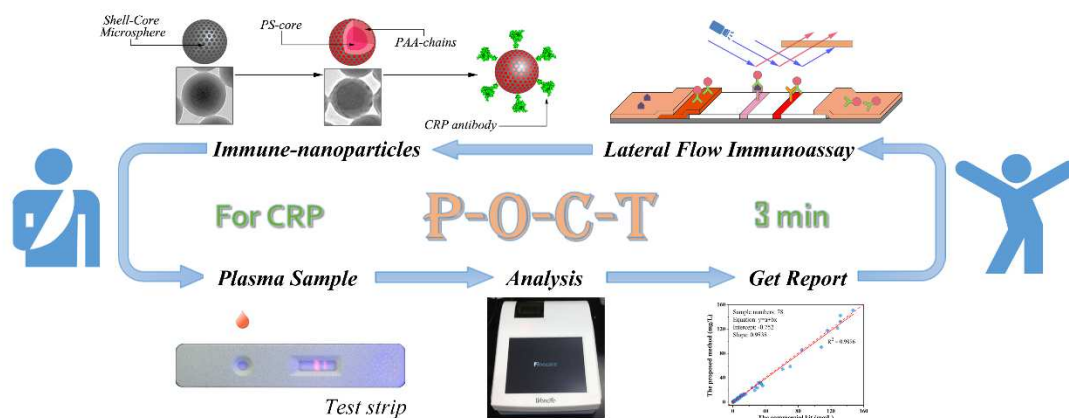

Received Date: 17 May 2018

Revised Date: 17 June 2018

Accepted Date: 18 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Graphical abstract

Schematic presentation of lateral flow immunoassays (LFIA) based on the use of red fluorescent nanoparticles (RPNs) as signaling labels for the rapid determination of C-reactive protein (CRP) in plasma samples and the core-shell structure of the RPNs.
