Subcellular fractionation of human liver reveals limits in global proteomic quantification from isolated fractions

Jacek R. Wiśniewski, Christine Wegler, Per Artursson

PII: S0003-2697(16)30133-6

DOI: [10.1016/j.ab.2016.06.006](https://doi.org/10.1016/j.ab.2016.06.006)

Reference: YABIO 12408

To appear in: *Analytical Biochemistry*

Received Date: 10 May 2016

Accepted Date: 4 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Subcellular fractionation of human liver reveals limits in global proteomic quantification from isolated fractions
