Accepted Manuscript

A novel multivariate calibration method based on variable adaptive boosting partial least squares algorithm

Pao Li, Guorong Du, Yanjun Ma, Jun Zhou, Liwen Jiang

PII: S0169-7439(17)30492-6

DOI: 10.1016/j.chemolab.2018.03.013

Reference: CHEMOM 3607

To appear in: Chemometrics and Intelligent Laboratory Systems

Received Date: 26 July 2017

Revised Date: 23 March 2018

Accepted Date: 25 March 2018

Please cite this article as: P. Li, G. Du, Y. Ma, J. Zhou, L. Jiang, A novel multivariate calibration method based on variable adaptive boosting partial least squares algorithm, *Chemometrics and Intelligent Laboratory Systems* (2018), doi: 10.1016/j.chemolab.2018.03.013.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
