Ensemble deep kernel learning with application to quality prediction in industrial polymerization processes

Yi Liu, Chao Yang, Zengliang Gao, Yuan Yao

PII: S0169-7439(17)30757-8

DOI: [10.1016/j.chemolab.2018.01.008](https://doi.org/10.1016/j.chemolab.2018.01.008)

Reference: CHEMOM 3576

To appear in: *Chemometrics and Intelligent Laboratory Systems*

Received Date: 28 November 2017

Revised Date: 15 January 2018

Accepted Date: 20 January 2018

Please cite this article as: Y. Liu, C. Yang, Z. Gao, Y. Yao, Ensemble deep kernel learning with application to quality prediction in industrial polymerization processes, *Chemometrics and Intelligent Laboratory Systems* (2018), doi: 10.1016/j.chemolab.2018.01.008.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ensemble deep kernel learning with application to quality prediction in industrial polymerization processes
