This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Electrochemical nonenzymatic sensor based on
cetyltrimethylammonium bromide and chitosan functionalized carbon
nanotube modified glassy carbon electrode for the determination of
hydroxymethanesulfinate in the presence of sulfite in foods

Running title:

HMS detection in the presence of sulfite based on CTAB-CNT-Chit /GCE
