Screening of critical factors influencing the efficient hydrolysis of zeaxanthin dipalmitate in an adapted *in vitro*- digestion model

Xin Wen, Judith Hempel, Ralf M. Schweiggert, Yuxiao Wang, Yuanying Ni, Reinhold Carle

PII: S0308-8146(18)30343-1

DOI: <https://doi.org/10.1016/j.foodchem.2018.02.116>

Reference: FOCH 22500

To appear in: *Food Chemistry*

Received Date: 6 November 2017

Revised Date: 5 February 2018

Accepted Date: 20 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Screening of critical factors influencing the efficient hydrolysis of zeaxanthin dipalmitate in an adapted *in vitro*-digestion model
