

## Accepted Manuscript

Changes in phenolic acid composition and associate enzyme activity in shoot and kernel fractions of brown rice during germination

Dong-Hwa Cho, Seung-Taik Lim

PII: S0308-8146(18)30267-X

DOI: <https://doi.org/10.1016/j.foodchem.2018.02.040>

Reference: FOCH 22424

To appear in: *Food Chemistry*

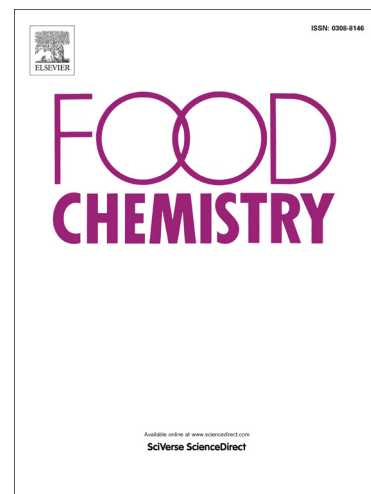

Received Date: 12 September 2017

Revised Date: 1 February 2018

Accepted Date: 8 February 2018

Please cite this article as: Cho, D-H., Lim, S-T., Changes in phenolic acid composition and associate enzyme activity in shoot and kernel fractions of brown rice during germination, *Food Chemistry* (2018), doi: <https://doi.org/10.1016/j.foodchem.2018.02.040>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Changes in phenolic acid composition and associate enzyme activity in shoot and kernel  
fractions of brown rice during germination**
