Short communication

First evidence of ethyl-hydrogen phosphonate (fosetyl) formation in winemaking

Loris Tonidandel, Tomás Román, Giorgio Nicolini, Roberto Larcher

PII: S0308-8146(18)30301-7

DOI: <https://doi.org/10.1016/j.foodchem.2018.02.065>

Reference: FOCH 22449

To appear in: *Food Chemistry*

Received Date: 23 October 2017

Revised Date: 8 February 2018

Accepted Date: 12 February 2018

Please cite this article as: Tonidandel, L., Román, T., Nicolini, G., Larcher, R., First evidence of ethyl-hydrogen phosphonate (fosetyl) formation in winemaking, *Food Chemistry* (2018), doi: <https://doi.org/10.1016/j.foodchem.2018.02.065>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **First evidence of ethyl-hydrogen phosphonate (fosetyl) formation in winemaking**

2

3 Loris Tonidandel¹, Tomás Román^{*1}, Giorgio Nicolini, and Roberto Larcher.
