

## Accepted Manuscript

A magnetic controllable tool for the selective enrichment of dimethoate from olive oil samples: a responsive molecular imprinting-based approach

Raquel Garcia, Elisabete P. Carreiro, João P. Prates Ramalho, J. Mirão, Anthony J. Burke, Marco D.R. Gomes da Silva, Ana Maria Costa Freitas, Maria João Cabrita

PII: S0308-8146(18)30228-0  
DOI: <https://doi.org/10.1016/j.foodchem.2018.02.003>  
Reference: FOCH 22387

To appear in: *Food Chemistry*

Received Date: 5 July 2017  
Revised Date: 24 November 2017  
Accepted Date: 1 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
