Effects of processing methods on composition and functionality of volatile components isolated from immature fruits of atemoya

Tai-Ti Liu, Louis Kuop-Ping Chao, Chi-Wei Peng, Tsung-Shi Yang

PII: S0308-8146(16)30116-9
DOI: <http://dx.doi.org/10.1016/j.foodchem.2016.01.111>
Reference: FOCH 18685

To appear in: *Food Chemistry*

Received Date: 22 October 2015
Revised Date: 26 January 2016
Accepted Date: 27 January 2016

Please cite this article as: Liu, T-T., Chao, L.K., Peng, C-W., Yang, T-S., Effects of processing methods on composition and functionality of volatile components isolated from immature fruits of atemoya, *Food Chemistry* (2016), doi: <http://dx.doi.org/10.1016/j.foodchem.2016.01.111>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effects of processing methods on composition and functionality of
volatile components isolated from immature fruits of atemoya

Running title: Effects of processing methods on composition and functionality...
