

## Accepted Manuscript

Changes in polyphenol profiles and color composition of freshly fermented model wine due to pulsed electric field, enzymes and thermovinification pre-treatments

Nada El Darra, Mohammad F. Turk, Marie-Agnès Ducasse, Nabil Grimi, Richard G. Maroun, Nicolas Louka, Eugène Vorobiev

PII: S0308-8146(15)01257-1  
DOI: <http://dx.doi.org/10.1016/j.foodchem.2015.08.059>  
Reference: FOCH 18007

To appear in: *Food Chemistry*

Received Date: 1 April 2015  
Revised Date: 17 August 2015  
Accepted Date: 17 August 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
