Modeling and optimizing of physicochemical features of walnut-oil beverage emulsions by implementation of response surface methodology: Effect of preparation conditions on emulsion stability

Mina Homayoonfal, Faramarz Khodaiyan, Seyed Mohammad Mousavi

PII: S0308-8146(14)01681-1

DOI: <http://dx.doi.org/10.1016/j.foodchem.2014.10.117>

Reference: FOCH 16646

To appear in: *Food Chemistry*

Received Date: 30 July 2013

Revised Date: 18 August 2014

Accepted Date: 21 October 2014

Please cite this article as: Homayoonfal, M., Khodaiyan, F., Mousavi, S.M., Modeling and optimizing of physicochemical features of walnut-oil beverage emulsions by implementation of response surface methodology: Effect of preparation conditions on emulsion stability, *Food Chemistry* (2014), doi: <http://dx.doi.org/10.1016/j.foodchem.2014.10.117>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Modeling and optimizing of physicochemical features of walnut-oil beverage emulsions**
2 **by implementation of response surface methodology: Effect of preparation conditions**
3 **on emulsion stability**
