Comprehension of direct extraction of hydrophilic antioxidants using vegetable oils by polar paradox theory and small angle X-ray scattering analysis

Ying Li, Anne Sylvie Fabiano-Tixier, Karine Ruiz, Anne Rossignol Castera, Pierre Bauduin, Olivier Diat, Farid Chemat

PII: S0308-8146(14)01623-9
DOI: <http://dx.doi.org/10.1016/j.foodchem.2014.10.061>
Reference: FOCH 16588

To appear in: *Food Chemistry*

Received Date: 26 February 2014
Revised Date: 14 September 2014
Accepted Date: 11 October 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Comprehension of direct extraction of hydrophilic
2 antioxidants using vegetable oils by polar paradox theory
3 and small angle X-ray scattering analysis

4

5 **abbreviated running title** : Comprehension of direct oil enrichment in
6 hydrophilic antioxidants
