Combined effect of pH and high temperature on the stability and antioxidant capacity of two anthocyanins in aqueous solution

Xiaonan Sui, Xin Dong, Weibiao Zhou

PII: S0308-8146(14)00632-3

DOI: <http://dx.doi.org/10.1016/j.foodchem.2014.04.075>

Reference: FOCH 15737

To appear in: *Food Chemistry*

Received Date: 29 January 2014

Revised Date: 16 April 2014

Accepted Date: 18 April 2014

Please cite this article as: Sui, X., Dong, X., Zhou, W., Combined effect of pH and high temperature on the stability and antioxidant capacity of two anthocyanins in aqueous solution, *Food Chemistry* (2014), doi: <http://dx.doi.org/10.1016/j.foodchem.2014.04.075>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Combined effect of pH and high temperature on the
stability and antioxidant capacity of two anthocyanins
in aqueous solution**
