

Accepted Manuscript

The use of Vis/NIRS and chemometric analysis to predict fruit defects and post-harvest behaviour of 'Nules Clementine' mandarin fruit

Lembe Samukelo Magwaza, Sandra Landahl, Paul J.R. Cronje, H el ene H. Nieuwoudt, Abdul Mounem Mouazen, Bart M. Nicolai, Leon A. Terry, Umezuruike Linus Opara

PII: S0308-8146(14)00655-4
DOI: <http://dx.doi.org/10.1016/j.foodchem.2014.04.085>
Reference: FOCH 15747

To appear in: *Food Chemistry*

Received Date: 24 August 2013
Revised Date: 22 April 2014
Accepted Date: 23 April 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **The use of Vis/NIRS and chemometric analysis to predict fruit defects and postharvest**
2 **behaviour of ‘Nules Clementine’ mandarin fruit**
