Determination of technological maturity of grapes and total phenolic compounds of grape skins in red and white cultivars during ripening by near infrared hyperspectral image: A preliminary approach

Julio Nogales-Bueno, José Miguel Hernández-Hierro, Francisco José Rodríguez-Pulido, Francisco José Heredia

PII: S0308-8146(13)01885-2
DOI: <http://dx.doi.org/10.1016/j.foodchem.2013.12.030>
Reference: FOCH 15146

To appear in: *Food Chemistry*

Received Date: 2 September 2013
Revised Date: 29 November 2013
Accepted Date: 7 December 2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Determination of technological maturity of grapes and total phenolic**
2 **compounds of grape skins in red and white cultivars during ripening**
3 **by near infrared hyperspectral image: A preliminary approach.**
