Title: Fundamental aspects of field-amplified electrokinetic injection of cations for enantioselective capillary electrophoresis with sulfated cyclodextrins as selectors

Authors: Jozef Šesták, Regula Theurillat, Friederike A. Sandbaumbhüter, Wolfgang Thormann

PII: S0021-9673(18)30594-6
DOI: <https://doi.org/10.1016/j.chroma.2018.05.022>
Reference: CHROMA 359390

To appear in: *Journal of Chromatography A*

Received date: 28-2-2018
Revised date: 2-5-2018
Accepted date: 8-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fundamental aspects of field-amplified electrokinetic injection of cations for enantioselective capillary electrophoresis with sulfated cyclodextrins as selectors
