Title: Development of a micro-solid-phase extraction molecularly imprinted polymer technique for synthetic cannabinoids assessment in urine followed by liquid chromatography–tandem mass spectrometry

Authors: Juan Sánchez-González, Sara Odoardi, Ana María Bermejo, Pilar Bermejo-Barrera, Francesco Saverio Romolo, Antonio Moreda-Piñeiro, Sabina Strano-Rossi

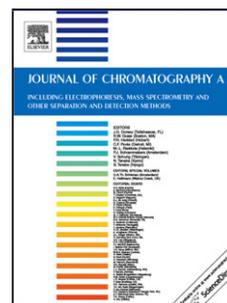

PII: S0021-9673(18)30364-9
DOI: <https://doi.org/10.1016/j.chroma.2018.03.049>
Reference: CHROMA 359288

To appear in: *Journal of Chromatography A*

Received date: 3-1-2018
Revised date: 6-3-2018
Accepted date: 24-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Development of a micro-solid-phase extraction molecularly imprinted polymer technique for synthetic cannabinoids assessment in urine followed by liquid chromatography - tandem mass spectrometry
