

Accepted Manuscript

Title: Partition Constant Database for Totally Organic Biphasic Systems

Author: Colin F. Poole

PII: S0021-9673(17)31583-2
DOI: <https://doi.org/10.1016/j.chroma.2017.10.061>
Reference: CHROMA 358966

To appear in: *Journal of Chromatography A*

Received date: 20-9-2017
Revised date: 14-10-2017
Accepted date: 25-10-2017

Please cite this article as: Colin F.Poole, Partition Constant Database for Totally Organic Biphasic Systems, *Journal of Chromatography A* <https://doi.org/10.1016/j.chroma.2017.10.061>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Partition Constant Database for Totally Organic Biphasic Systems

By

Colin F. Poole

Department of Chemistry
Wayne State University

Tel: 313-577-2881

Fax: 313-577-1377

Highlights

Partition constants for over 300 compounds of industrial, environmental and biological interest

Nineteen totally organic biphasic systems

Selection guide for biphasic systems

System constants facilitate the estimation of further partition constants
