

## Accepted Manuscript

Title: Kinetic simulation of complex decomposition as a tool for the ion chromatographic determination of elemental speciation of less inert metal ions

Author: Christian Winter Andreas Seubert

PII: S0021-9673(15)01792-6  
DOI: <http://dx.doi.org/doi:10.1016/j.chroma.2015.12.023>  
Reference: CHROMA 357125

To appear in: *Journal of Chromatography A*

Received date: 9-10-2015  
Revised date: 7-12-2015  
Accepted date: 8-12-2015

Please cite this article as: Christian Winter, Andreas Seubert, Kinetic simulation of complex decomposition as a tool for the ion chromatographic determination of elemental speciation of less inert metal ions, *Journal of Chromatography A* <http://dx.doi.org/10.1016/j.chroma.2015.12.023>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Kinetic simulation of complex decomposition as a tool for the ion chromatographic determination of elemental speciation of less inert metal ions**
