Potential biomarkers of Parkinson's disease revealed by plasma metabolic profiling

Huiyuan Zhao, Cui Wang, Nan Zhao, Wenxue Li, Zhaofei Yang, Xinxin Liu, Weidong Le, Xiaozhe Zhang

PII: S1570-0232(17)31905-0
DOI: <https://doi.org/10.1016/j.jchromb.2018.01.025>
Reference: CHROMB 21006

To appear in:

Received date: 17 November 2017
Revised date: 17 January 2018
Accepted date: 20 January 2018

Please cite this article as: Huiyuan Zhao, Cui Wang, Nan Zhao, Wenxue Li, Zhaofei Yang, Xinxin Liu, Weidong Le, Xiaozhe Zhang , Potential biomarkers of Parkinson's disease revealed by plasma metabolic profiling. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Potential Biomarkers of Parkinson's Disease Revealed by Plasma Metabolic Profiling.

Highlights

- UPLC-MS based metabolism analysis.
- Clinical plasma samples from patients with Parkinson's disease based metabolism analysis.
- Metabolic pathway and network specialty related to Parkinson's disease.
