Title: Influence of direct and sequential extraction methodology on metabolic profiling

Authors: K.M. Maria John, James Harnly, Devanand Luthria

PII: S1570-0232(17)32060-3
DOI: <https://doi.org/10.1016/j.jchromb.2017.12.005>
Reference: CHROMB 20948

To appear in: *Journal of Chromatography B*

Received date: 5-9-2017
Revised date: 1-12-2017
Accepted date: 3-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of direct and sequential extraction methodology on metabolic profiling

ABSTRACT:

A systematic comparison was made of the detected metabolite profiles for two plant materials (black beans and soybeans) and a dietary supplement (black cohosh) extracted using sequential
