This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original research article

A systematic method to evaluate the dietary intake data coding process used in the research setting¹

Vivienne Guan ^{a,*}, Yasmine Probst ^{a,b}, Elizabeth Neale ^{a,b}, Allison Martin ^{a,b} and Linda Tapsell ^{a,b}

Highlights

- Source data verification can be used to evaluate dietary coding quality
- Accuracy, completeness, consistency are required to assess dietary coding quality
- A detailed dietary intake data coding protocol must be set before collecting data
- Protocol must be implemented during coding process to ensure data coding quality
