

Accepted Manuscript

Title: The influence of nitrogen and potassium fertilisation on the content of polyphenolic compounds and antioxidant capacity of coloured potato

Author: Anna Michalska Aneta Wojdyło Bożena Bogucka

PII: S0889-1575(16)30001-1
DOI: <http://dx.doi.org/doi:10.1016/j.jfca.2016.01.004>
Reference: YJFCA 2673

To appear in:

Received date: 3-12-2015
Revised date: 8-1-2016
Accepted date: 14-1-2016

Please cite this article as: Michalska, Anna., Wojdyło, Aneta., & Bogucka, Bożena., The influence of nitrogen and potassium fertilisation on the content of polyphenolic compounds and antioxidant capacity of coloured potato. *Journal of Food Composition and Analysis* <http://dx.doi.org/10.1016/j.jfca.2016.01.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Type of the paper: Original Research Article

The influence of nitrogen and potassium fertilisation on the content of polyphenolic compounds and antioxidant capacity of coloured potato
