Title: Recent developments in green membrane-based extraction techniques for pharmaceutical and biomedical analysis

Authors: Hadi Tabani, Saeed Nojavan, Michal Alexovič, Ján Sabo

PII: S0731-7085(18)31144-0
DOI: <https://doi.org/10.1016/j.jpba.2018.08.002>
Reference: PBA 12133

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 14-5-2018
Revised date: 1-8-2018
Accepted date: 3-8-2018

Please cite this article as: Tabani H, Nojavan S, Alexovič M, Sabo J, Recent developments in green membrane-based extraction techniques for pharmaceutical and biomedical analysis, *Journal of Pharmaceutical and Biomedical Analysis* (2018), <https://doi.org/10.1016/j.jpba.2018.08.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Recent developments in green membrane-based extraction techniques for pharmaceutical and biomedical analysis

Highlights

- State-of-the-art developments in membrane extraction are presented for pharmaceutical and biomedical analysis.
- Green membranes are classified according to porous and nonporous modes.
- Key aspects of modern versus classical approaches are thoroughly discussed.
- Pros and cons of each membrane extraction mode is explained.
