Title: Pranoprofen quantification in *ex vivo* corneal and scleral permeation samples: Analytical validation

Authors: C. Cañadas-Enrich, G. Abrego, H.L. Alvarado, A.C. Calpena-Capmany, A. Boix-Montañes

PII: S0731-7085(18)31275-5
DOI: <https://doi.org/10.1016/j.jpba.2018.07.015>
Reference: PBA 12086

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 20-6-2018
Revised date: 9-7-2018
Accepted date: 12-7-2018

Highlights

- Porcine cornea and sclera permeation of pranoprofen has been evaluated.
- The method is valid to quantify drug permeation from 22.3 µg/cm²
- Permeation profiles may be explained as function of sink-compliance.
- Drug quantitation in permeation and tissue-retention samples is validated
