Title: Simultaneous determination of alkaloids dicentrine and sinomenine in *Stephania epigaea* by ^1H NMR spectroscopy

Authors: Jian-Wei Dong, Xue-Jiao Li, Le Cai, Jun-You Shi, Yu-Feng Li, Cui Yang, Zhen-Jie Li

PII: S0731-7085(18)30924-5
DOI: <https://doi.org/10.1016/j.jpba.2018.08.007>
Reference: PBA 12138

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 19-4-2018
Revised date: 30-7-2018
Accepted date: 4-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Simultaneous determination of alkaloids dicentrine and sinomenine in *Stephania epigaea* by ^1H NMR spectroscopy

Highlights

- A qHNMR method for quantitation of dicentrine and sinomenine was developed.
- DMSO-*d*₆ enabled satisfactory separation of the signals to be integrated.
- Dimethyl terephthalate was selected as an internal standard for qHNMR.
