Title: A rapid magnetic particle-based enzyme immunoassay for human cytomegalovirus glycoprotein B detection

Authors: F. Pires, M. Julia Arcos-Martinez, Cristina Dias-Cabral, Juan C. Vidal, Juan R. Castillo

PII: S0731-7085(18)30177-8
DOI: <https://doi.org/10.1016/j.jpba.2018.04.019>
Reference: PBA 11918

To appear in: *Journal of Pharmaceutical and Biomedical Analysis*

Received date: 19-1-2018
Revised date: 11-4-2018
Accepted date: 13-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A rapid magnetic particle-based enzyme immunoassay for human cytomegalovirus glycoprotein B detection

Highlights

- Sensitive magnetic particles-based enzyme immunoassay for gB-HCMV detection
- Very efficient oriented antibody immobilization on protein G-functionalized MBs
- Improved selectivity due to a sandwich immunoassay scheme using two antibodies
- The method shows great potential for clinical applications
