Comparative qualitative phosphoproteomics analysis identifies shared phosphorylation motifs and associated biological processes in evolutionary divergent plants

Shireen Al-Momani, Da Qi, Zhe Ren, Andrew R. Jones

PII: S1874-3919(18)30170-2
DOI: doi:[10.1016/j.jprot.2018.04.011](https://doi.org/10.1016/j.jprot.2018.04.011)
Reference: JPROT 3107
To appear in: *Journal of Proteomics*
Received date: 19 December 2017
Revised date: 29 March 2018
Accepted date: 3 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparative Qualitative Phosphoproteomics Analysis Identifies Shared Phosphorylation Motifs and Associated Biological Processes in evolutionary divergent plants
