

Accepted Manuscript

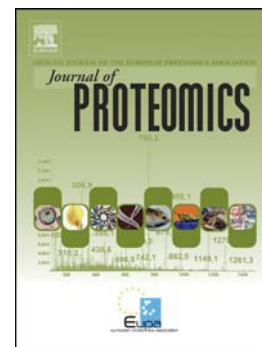

Proteomics and antivenomics of Papuan black snake (*Pseudechis papuanus*) venom with analysis of its toxicological profile and the preclinical efficacy of Australian antivenoms

Davinia Pla, Benjamin W. Bande, Ronelle E. Welton, Owen K. Paiva, Libia Sanz, Álvaro Segura, Christine E. Wright, Juan J. Calvete, José María Gutiérrez, David J. Williams

PII: S1874-3919(16)30418-3
DOI: doi: [10.1016/j.jprot.2016.09.007](https://doi.org/10.1016/j.jprot.2016.09.007)
Reference: JPROT 2677

To appear in: *Journal of Proteomics*

Received date: 13 August 2016
Revised date: 15 September 2016
Accepted date: 16 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Proteomics and antivenomics of Papuan black snake (*Pseudechis papuanus*) venom with analysis of its toxicological profile and the preclinical efficacy of Australian antivenoms
