Potential of near infrared spectroscopy for predicting the physicochemical properties on potato flesh

Olga Escuredo, Ana Seijo-Rodríguez, M. Inmaculada González-Martín, M. Shantal Rodríguez-Flores, M. Carmen Seijo

PII: S0026-265X(18)30421-1
DOI: [doi:10.1016/j.microc.2018.06.008](https://doi.org/10.1016/j.microc.2018.06.008)
Reference: MICROC 3208
To appear in: *Microchemical Journal*
Received date: 9 April 2018
Revised date: 6 June 2018
Accepted date: 6 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Potential of near infrared spectroscopy for predicting the physicochemical properties on potato flesh
