

Accepted Manuscript

Determination of heterocyclic aromatic amines in airborne particulate matter (PM_{2.5} and PM₁₀) from different emission sources by ultra-high performance liquid chromatography-tandem mass spectrometry

Romina Canales, Mariana Achad, Patricia Smichowski, Darío Gómez, Mario Reta, Soledad Cerutti

PII: S0026-265X(17)31307-3
DOI: doi:[10.1016/j.microc.2018.02.012](https://doi.org/10.1016/j.microc.2018.02.012)
Reference: MICROC 3051
To appear in: *Microchemical Journal*
Received date: 22 December 2017
Revised date: 9 February 2018
Accepted date: 11 February 2018

Please cite this article as: Romina Canales, Mariana Achad, Patricia Smichowski, Darío Gómez, Mario Reta, Soledad Cerutti, Determination of heterocyclic aromatic amines in airborne particulate matter (PM_{2.5} and PM₁₀) from different emission sources by ultra-high performance liquid chromatography-tandem mass spectrometry. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Determination of heterocyclic aromatic amines in airborne particulate matter (PM_{2.5} and PM₁₀) from different emission sources by ultra-high performance liquid chromatography-tandem mass spectrometry
