The future of liquid chromatographic separations should include post column derivatisations: A discussion view point based on the perspective for the analysis of vitamin D

Andrew Jones, Visalini Nair-Shalliker, Gary R. Dennis, R. Andrew Shalliker

PII: S0026-265X(17)31225-0
DOI: <https://doi.org/10.1016/j.microc.2018.01.046>
Reference: MICROC 3038
To appear in: *Microchemical Journal*
Received date: 27 November 2017
Revised date: 30 January 2018
Accepted date: 30 January 2018

Please cite this article as: Andrew Jones, Visalini Nair-Shalliker, Gary R. Dennis, R. Andrew Shalliker , The future of liquid chromatographic separations should include post column derivatisations: A discussion view point based on the perspective for the analysis of vitamin D. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Microc(2017), <https://doi.org/10.1016/j.microc.2018.01.046>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The Future of Liquid Chromatographic Separations Should Include Post Column
Derivatisations: A discussion view point based on the perspective for the analysis of
vitamin D**
