

## Accepted Manuscript

Development of a nanostructured electrochemical immunosensor applied to the early detection of invasive aspergillosis

Sofía V. Piguillem, Francisco G. Ortega, Julio Raba, Germán A. Messina, Martín A. Fernández-Baldo

PII: S0026-265X(17)31335-8  
DOI: doi:[10.1016/j.microc.2018.03.025](https://doi.org/10.1016/j.microc.2018.03.025)  
Reference: MICROC 3098  
To appear in: *Microchemical Journal*  
Received date: 28 December 2017  
Revised date: 22 February 2018  
Accepted date: 15 March 2018

Please cite this article as: Sofia V. Piguillem, Francisco G. Ortega, Julio Raba, Germán A. Messina, Martín A. Fernández-Baldo , Development of a nanostructured electrochemical immunosensor applied to the early detection of invasive aspergillosis. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Microc*(2017), doi:[10.1016/j.microc.2018.03.025](https://doi.org/10.1016/j.microc.2018.03.025)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Development of a nanostructured electrochemical immunosensor applied to the early  
detection of invasive aspergillosis**
