

Accepted Manuscript

Blue emitting copper nanoclusters as colorimetric and fluorescent probe for the selective detection of bilirubin

R.S. Aparna, J.S. Anjali Devi, Nebu John, K. Abha, S.S. Syamchand, Sony George

PII: S1386-1425(18)30229-4
DOI: doi:[10.1016/j.saa.2018.03.045](https://doi.org/10.1016/j.saa.2018.03.045)
Reference: SAA 15917

To appear in: *Spectrochimica Acta Part A: Molecular and Biomolecular Spectroscopy*

Received date: 29 October 2017
Revised date: 1 March 2018
Accepted date: 12 March 2018

Please cite this article as: R.S. Aparna, J.S. Anjali Devi, Nebu John, K. Abha, S.S. Syamchand, Sony George , Blue emitting copper nanoclusters as colorimetric and fluorescent probe for the selective detection of bilirubin. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
