A phenolic acid based colourimetric ‘naked-eye’ chemosensor for the rapid detection of Cu(II) ions

Priti Sengupta, Aniruddha Ganguly, Adity Bose

PII: S1386-1425(18)30196-3
DOI: [doi:10.1016/j.saa.2018.03.005](https://doi.org/10.1016/j.saa.2018.03.005)
Reference: SAA 15877

To appear in: *Spectrochimica Acta Part A: Molecular and Biomolecular Spectroscopy*

Received date: 17 August 2017
Revised date: 27 February 2018
Accepted date: 2 March 2018

Please cite this article as: Priti Sengupta, Aniruddha Ganguly, Adity Bose , A phenolic acid based colourimetric ‘naked-eye’ chemosensor for the rapid detection of Cu(II) ions. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Saa(2017), doi:[10.1016/j.saa.2018.03.005](https://doi.org/10.1016/j.saa.2018.03.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
