Critical assessment of hexavalent chromium species from different solid environmental, industrial and food matrices

F. Séby, V. Vacchina

PII: S0165-9936(17)30344-8

DOI: [10.1016/j.trac.2017.11.019](https://doi.org/10.1016/j.trac.2017.11.019)

Reference: TRAC 15077

To appear in: *Trends in Analytical Chemistry*

Received Date: 5 September 2017

Revised Date: 24 November 2017

Accepted Date: 29 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Critical assessment of hexavalent chromium species from different solid
environmental, industrial and food matrices

F. Séby* and V. Vacchina
