Spatially Offset Raman Spectroscopy for Non-invasive Analysis of Turbid Samples

Pavel Matousek

PII: S0165-9936(17)30446-6

DOI: [10.1016/j.trac.2018.04.002](https://doi.org/10.1016/j.trac.2018.04.002)

Reference: TRAC 15130

To appear in: *Trends in Analytical Chemistry*

Received Date: 7 November 2017

Revised Date: 14 March 2018

Accepted Date: 3 April 2018

Please cite this article as: P. Matousek, Spatially Offset Raman Spectroscopy for Non-invasive Analysis of Turbid Samples, *Trends in Analytical Chemistry* (2018), doi: 10.1016/j.trac.2018.04.002.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The development of Spatially Offset Raman Spectroscopy (SORS) opened a number of new analytical areas across several fields including security screening, pharmaceutical and food analysis, medical diagnosis and characterisation of objects of art.
