This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of pharmaceutical products and herbal medicines using ambient mass spectrometry

Highlights

- Pharmaceutical and herbal medicine analysis using ambient MS was reviewed.
- Ambient ionization techniques applied for pharmaceutical analysis were summarized.
- Analytical strategies of ambient MS for analysis of pharmaceuticals were commented.
- Active pharmaceutical ingredients analyzed by ambient MS were summarized.
- Quality assessment and control of herbal medicines by ambient MS were discussed.

Abstract

Pharmaceutical analysis is an important approach to understand the active pharmaceutical ingredients and impurities in pharmaceutical products and herbal medicines as well as to develop
