Title: Mixed-mode chromatographic stationary phases: recent advancements and its applications for high performance liquid chromatography

Author: Lu Zhang, Qian Dai, Xiaoqiang Qiao, Chenyang Yu, Xinying Qin, Hongyuan Yan

PII: S0165-9936(16)30038-3

DOI: <http://dx.doi.org/doi: 10.1016/j.trac.2016.05.011>

Reference: TRAC 14754

To appear in: *Trends in Analytical Chemistry*

Please cite this article as: Lu Zhang, Qian Dai, Xiaoqiang Qiao, Chenyang Yu, Xinying Qin, Hongyuan Yan, Mixed-mode chromatographic stationary phases: recent advancements and its applications for high performance liquid chromatography, *Trends in Analytical Chemistry* (2016), <http://dx.doi.org/doi: 10.1016/j.trac.2016.05.011>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mixed-mode chromatographic stationary phases: Recent advancements and its applications for high performance liquid chromatography

Lu Zhang ^a, Qian Dai ^a, Xiaoqiang Qiao ^{a,*}, Chenyang Yu ^a, Xinying Qin ^b, Hongyuan Yan ^a

Highlights

- The recently reported particle-based mixed-mode stationary phases are summarized.
- The recently reported monolithic-based mixed-mode stationary phases are included.
- The mixed-mode stationary phases are classified based on the HPLC modes.
- The review emphasizes on the preparation methods and further applications .
