Title: Trends in fingerprint analysis

Author: Crystal Huynh, Jan Halámek

 PII:
 S0165-9936(16)30096-6

 DOI:
 http://dx.doi.org/doi: 10.1016/j.trac.2016.06.003

 Reference:
 TRAC 14775

To appear in: Trends in Analytical Chemistry

Please cite this article as: Crystal Huynh, Jan Halámek, Trends in fingerprint analysis, *Trends in Analytical Chemistry* (2016), http://dx.doi.org/doi: 10.1016/j.trac.2016.06.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Fingerprint analysis via pictorial comparison has not improved in the past century.
- Alternative methods currently rely on complex, immobile instrumentation.
- Research on portable fingerprint analysis methods using currently in progress.
- Simple, portable fingerprint analysis methods will be a useful tool for forensics.
