Title: Nanomaterials-based electrochemical immunosensors for cardiac troponin recognition: An illustrated review

Author: Mojgan Abdorahim, Mohammad Rabiee, Sanaz Naghavi Alhosseini, Mohammadreza Tahriri, Sara Yazdanpanah, S. Habib Alavi, Lobat Tayebi

PII: S0165-9936(16)30044-9

DOI: <http://dx.doi.org/doi: 10.1016/j.trac.2016.06.015>

Reference: TRAC 14787

To appear in: *Trends in Analytical Chemistry*

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nanomaterials-based electrochemical immunosensors for cardiac troponin recognition: An illustrated review

Highlights

- Novel electrochemical biosensors for cardiac troponin recognition are introduced.
- Recent advances in electrochemical sensing of cardiac troponin are discussed.
- Serious problems in electrochemical sensing cardiac troponin are discussed.
