Title: Mixed surfactant (altering chain length and head group) aggregates as an effective carrier for tuberculosis drug

Authors: Arun Kumar, Rekha, S.K. Kansal, A.O. Ibadon, S.K. Mehta

PII: S0009-3084(18)30064-1
DOI: <https://doi.org/10.1016/j.chemphyslip.2018.07.001>
Reference: CPL 4666

To appear in: *Chemistry and Physics of Lipids*

Received date: 16-4-2018
Revised date: 18-6-2018
Accepted date: 1-7-2018

Graphical Abstract

Research highlights

- Mixed surfactant aggregates were prepared and characterized.
- Rifampicin solubilization was comparatively analyzed and improved.
- Rifampicin was stabilized in highly basic medium and in strong oxidizing condition.
- Interaction site of rifampicin within aggregates was evaluated.
