Title: Ion-induced modification of the sucrose network and its impact on melting of freeze-dried liposomes. DSC and molecular dynamics study

Authors: Danijela Bakarić, Dražen Petrov, Yamuna Kunhi Mouvenchery, Stefan Heißler, Chris Oostenbrink, Gabriele E. Schaumann

PII: S0009-3084(17)30195-0
DOI: <https://doi.org/10.1016/j.chemphyslip.2017.11.015>
Reference: CPL 4617

To appear in: *Chemistry and Physics of Lipids*

Received date: 2-8-2017
Revised date: 14-11-2017
Accepted date: 23-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ion-induced modification of the sucrose network and its impact on melting of freeze-dried liposomes. DSC and molecular dynamics study
