Graphical Abstract

Solvent-tuned polyoxometalate-based supramolecular hybrids constructed from different metal-organic motifs: various structures and adsorption properties for dyes

Shan Zhang, Xiang Wang*, Hui-Xiu Zhang, Zi-Hui Zhao, Xiu-Li Wang*

Department of Chemistry, Bohai University, Jinzhou 121000, China.

Three polyoxometalate-based supramolecular hybrids with different metal-organic motifs have been synthesized by tuning the solvents, which show various adsorption activities for different organic dyes.
