Phthalimide and naphthalimide: Effect of end-capping groups on molecular properties and photovoltaic performance of 9-fluorenone based acceptors for organic solar cells

Thu-Trang Do, Jegadesan Subbiah, Sergei Manzhos, David Jones, John M. Bell, Prashant Sonar

PII: S1566-1199(18)30331-8

DOI: [10.1016/j.orgel.2018.06.040](https://doi.org/10.1016/j.orgel.2018.06.040)

Reference: ORGELE 4763

To appear in: *Organic Electronics*

Received Date: 24 March 2018

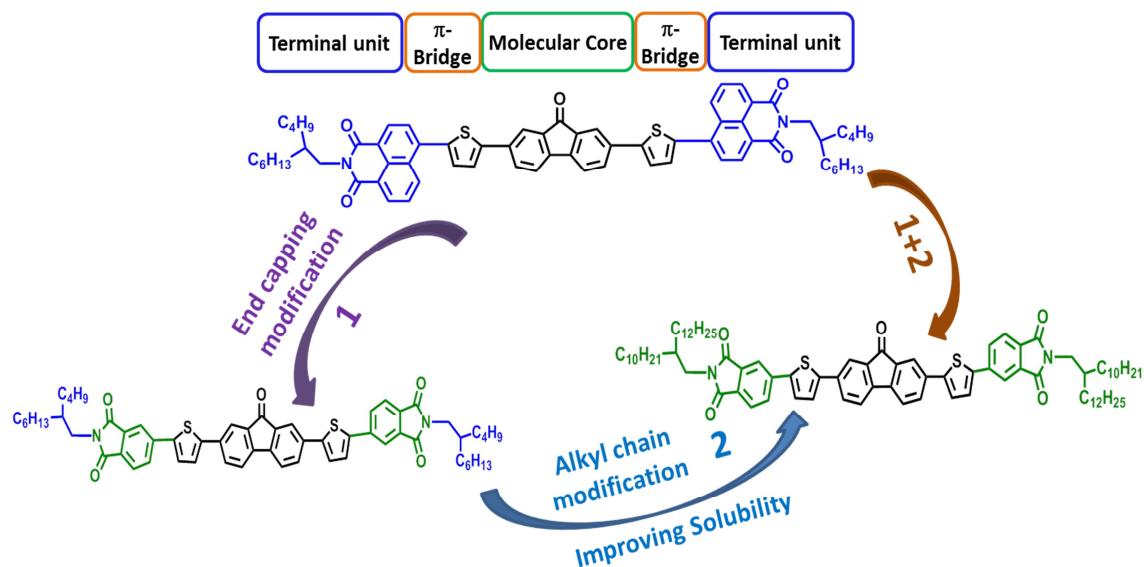

Revised Date: 26 June 2018

Accepted Date: 27 June 2018

Sonar, Phthalimide and naphthalimide: Effect of end-capping groups on molecular properties and photovoltaic performance of 9-fluorenone based acceptors for organic solar cells, *Organic Electronics* (2018), doi: 10.1016/j.orgel.2018.06.040.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TOC graph

A series of π -conjugated electron deficient small molecules were designed and synthesized with the configuration of central core, π -bridging unit and terminal building block.
