High-performance didodecylbenzothienobenzothiophene-based top-gate organic transistors processed by spin coating using binary solvent mixtures

Shoya Sanda, Takashi Nagase, Takashi Kobayashi, Kazuo Takimiya, Yuichi Sadamitsu, Hiroyoshi Naito

PII: S1566-1199(18)30177-0

DOI: [10.1016/j.orgel.2018.04.013](https://doi.org/10.1016/j.orgel.2018.04.013)

Reference: ORGELE 4621

To appear in: *Organic Electronics*

Received Date: 11 January 2018

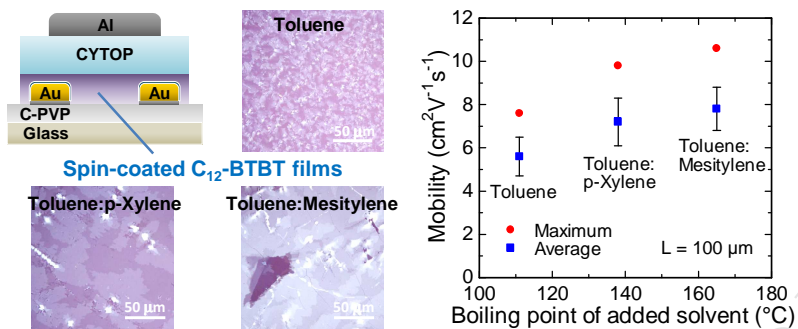

Revised Date: 4 April 2018

Accepted Date: 5 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
