Bright prospect of using alcohol-soluble Nb<sub>2</sub>O<sub>5</sub> as anode buffer layer for efficient polymer solar cells based on fullerene and non-fullerene acceptors

Yiming Bai, Bo Yang, Fuzhi Wang, Huiyun Liu, Tasawar Hayat, Ahmed Alsaedi, Zhan'ao Tan

PII: S1566-1199(17)30542-6

DOI: [10.1016/j.orgel.2017.11.010](https://doi.org/10.1016/j.orgel.2017.11.010)

Reference: ORGELE 4385

To appear in: *Organic Electronics*

Received Date: 27 September 2017

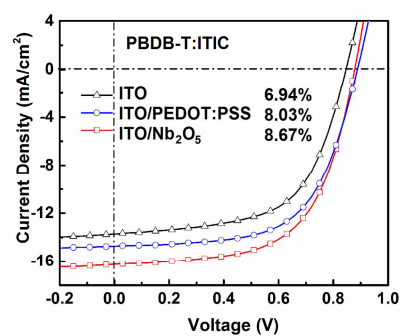

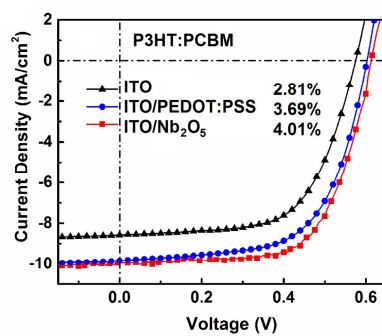

Revised Date: 3 November 2017

Accepted Date: 8 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
